

AUTOMATION TECHNICS

We Revolutionize Your Production! Fully Automated Manufacturing Concepts for Floor Mops

THE IDEA	<ul style="list-style-type: none">• Multifunctional manufacturing lines for the fully automated assembly of floor mops of all kinds from the most diverse materials• Our facilities combine different production steps and thereby offer you drastic time savings and increased production capacity.• ALL production steps are fully automated!
THE CONCEPT	<ul style="list-style-type: none">• Automated unrolling, cutting, feeding, seam whipping, and sewing up of materials• Flexible adjustment of stitch length• Automated feeding of labels (also made of plastic) and tags in different variations and designs• The assembled parts are packed automatically in the end• Applicable for floor mops, wipers, kitchen rugs, etc.
THE ADVANTAGES	<ul style="list-style-type: none">• Considerable savings in production time and short cycle times!• Visible increase of production capacity• Constant quality improvement with our innovative sewing monitoring systems• Different processes can be combined• With our new bobbin chamber exchanger the facility can also manufacture during breaks and after production time has officially ended• Fully automated concept, the machine only has to be fed• Even partial steps can be automated individually• Applicable for many sewing machines of all manufacturers, also the combined use of several sewing machines is possible!• Flexible and user-friendly control with our SAT Flex / SAT Control System
