

AUTOMATION TECHNICS

Open your mind!

## New RSG Label Dispenser Generation

### The Idea

- Processing and handling of labels is often still done manually.
- RSG semi-automatic workstations offer modern and flexible solutions for various production steps in a modular design.

### The Advantages

- Enormous production time savings and drastic production output increases are due to minimal cycle times!
- Easy handling allows consistent product results in highest quality.
- Customer-designed solutions and machine concepts are available.
- Flexible and user-friendly control with our SAT-Flex/SAT-Control System.

### The Concept

- RSG semi-automatic workstations include a sewing machine of your choice
- Operator friendly pedestal stands are moveable workstations.
- All units can be designed as single, tandem, or multi dispensers.
- One operator can handle up to three machines simultaneously.
- All options, such as unrolling, picking up single labels, printing, stacking, hot and cold cutting, dispensing, transportation, automatic unloading, diverse folding and changeable sewing patterns are possible.
- Now available with ultrasonic cutter for the perfect label cut!
- Our twin concept allows label feeding from two sides.
- **Our solution for the new labeling regulations: Up to 5 and more different labels can be dispensed, cut, aligned and sewn on top of each other automatically!**
- Production output depends on machine configuration, label-size, type of folding, sewing pattern, and operator performance
- Please contact us for your individual calculation!

... we make things better ...
