

AUTOMATION TECHNICS

RSG Narrow-Matic: Revolutionary automation-concepts for your production!

## Fully Automated Assembly of Webbing Slings/Endless Slings

### The Idea

- Multifunctional production lines Narrow-Matic for the fully automated assembly of endless flat slings, flat webbings slings, hoisting belts, lifting slings, and loops of different materials.
- Our facilities combine different production steps and thereby offer you drastic time savings, and increased production capacity.
- All production steps are fully automated!
- Implementation of many RSG patents is possible.

### The Concept

- Automated unrolling, cutting, feeding, folding, sewing, and winding of materials.
- Flexible adjustment of sling length.
- Automatic detection and cutting off of marked product mistakes
- Automated feeding of labels in different variations and types.
- Assembled parts bound and packed at machine exit.

### The Advantages

- Considerable savings regarding production and cycle-times.
- Visible increase of production capacity
- Constant quality improvements with innovative sewing monitoring.
- With the new bobbin exchanger the assembly-line can also manufacture during breaks and after official production time.
- Fully automated concept, only feeding of machine necessary.
- Possible application of labels.
- Useable for most sewing machines brands.
- Flexible and user-friendly control with our SAT-Flex/SAT-Control System.

... we make things better ...
