

AUTOMATION TECHNICS

OPEN YOUR MIND FOR PROCESS-AUTOMATION!

## RSG (Airbag) Strap Production Line

### The Idea

- Full-automatic production-line for (airbag-) straps or similar products; with or without buckles and brackets.

### The Concept

- Automatic unrolling, cutting to the needed length, feeding and folding for many different kinds of products.
- Possible implementation of sewing- or ultrasonic processes.
- Automatic detection and cutting-off of marked product-failures.
- Automatic folding in many different forms and fittings.
- Automatic loading and pulling-through of buckles or brackets made out of plastic or metal.
- Implementation of many RSG patents possible.

### The Advantages

- Major production time savings and drastic production output increases.
- Easy handling with minimal cycle times.
- Constant quality improvements.
- Optional: Automatic monitoring of the sewing process .
- All lines optionally designed as semi-automatic work stations with our unique tandem concept (one operator handles 2 units).
- Flexible and user-friendly control with our SAT-Flex/ SAT-Control System.
